

Python - Square

Purpose

This lab was designed to teach you how to use the `hideturtle` | `ht`, `showturtle` | `st`, `forward` | `fd`, `right` | `rt`, `goto` | `setpos` | `setposition` methods.

Description

Write a program in Python that will make a turtle move to the red square (hide/goto/show) located at `(-270, 155)`. Then have the turtle move around the screen following the white path only and stop when it returns to the red square.

Lab Restrictions: The green turtle cannot touch the navy or gold colors on the screen.

Program Shell

`lab_01_square.py`

Sample Execution
