

# Python - Ellipse

---

## Purpose

This lab was designed to teach you how to use the `hideturtle` | `ht`, `showturtle` | `st`, `goto` | `setpos` | `setposition` and `circle` methods.

## Description

Write a program in Python that will make a turtle move around the screen following the white path only and return to where it began. The pen size is set to 5 in the execution below.

## Program Shell

Create a file called `lab_02_ellipse.py` – use the same structure as `lab_01_square.py`  
Use the background image `lab_02_ellipse.png`

## Sample Execution
