Python – Range

Purpose

This lab was designed to teach you how to implement processes that iterate a determinate number of times.

Description

Code the following output using Python's for loop construct. The first line of each sequence has been printed out for you.

Program Shell

range.py

Sample Execution

```
1 2 3 4 5 6 7 8 9 10
1 2 3 4 5 6 7 8 9 10

2 4 6 8 10 12 14 16 18 20
2 4 6 8 10 12 14 16 18 20

10 9 8 7 6 5 4 3 2 1 0
10 9 8 7 6 5 4 3 2 1 0

100 90 80 70 60 50 40 30 20 10 0
100 90 80 70 60 50 40 30 20 10 0
```
